

SAMEER AHAMATH

Chennai, India | samir52790@gmail.com | +91 8667702473 | sameerahamath.tech

Full Stack Developer | PHP · Laravel · CodeIgniter | MERN Stack · React.js · Node.js

PROFESSIONAL SUMMARY

Versatile **Full Stack Developer** with production experience across **PHP (Laravel, CodeIgniter)** and **MERN stack (MongoDB, Express.js, React.js, Node.js)**. Delivered scalable web applications across domains including **MLM/SaaS platforms, e-commerce, real estate, AI computer vision, and tutoring platforms**. Proficient in **TypeScript, REST API design, CI/CD pipelines**, and integrations including **Stripe API, Brevo API, and OpenAI API**. Proven track record of leading cross-functional teams, architecting robust backend systems, and shipping responsive, high-performance products on time.

TECHNICAL SKILLS

PHP Stack:	PHP, Laravel, CodeIgniter, MySQL, PDO, AJAX, JSON, Session Management, cPanel
MERN Stack:	MongoDB, Express.js, React.js, Node.js, MongoDB Atlas, JWT Auth, REST API, Socket.io
Frontend:	JavaScript (ES6+), TypeScript, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS, Vue.js, Framer Motion, Material UI
DevOps & Tools:	Git, GitHub, Vercel, Render, CI/CD, Docker, Postman, Figma, VS Code, GCP, Azure, Digital Ocean
Integrations:	Stripe API, Brevo (SendGrid) API, SMTP, WhatsApp API, OpenAI API, TensorFlow.js

EDUCATION

M.Sc. Information Technology (Pursuing)

Bharathidasan University | 2025 – 2027

B.Sc. Information Technology

Jamal Mohamed College, Trichy | 2022 – 2025

WORK EXPERIENCE

MERN Stack Developer

Expert Hub — Onsite, Chennai, India | Feb 2026 – Mar 2026

- Developed responsive web applications using **React.js** and **Vue.js** with reusable **component-based architecture**, building dynamic UIs consumed by **RESTful API** services.
- Engineered **Node.js** and **Express.js** backend services with efficient **REST API** endpoints for user management, service listings, and contact form workflows.
- Modelled and managed **MongoDB** collections with optimized schemas and query patterns, ensuring scalable data handling across the production platform.

Frontend Developer

MCS — Remote, Bangalore, India | May 2025 – Nov 2025

- Built a responsive **multi-role MLM e-commerce web application** with **15+ theme variants** using **Bootstrap 5** and **PHP**, supporting Admin, Member, and Affiliate user roles with dynamic theme-switching.
- Developed complex **genealogy tree** and **network visualization** components in **vanilla JavaScript** for real-time member hierarchy and **commission-tracking dashboards**.
- Integrated **Stripe API** for payment processing and **Brevo API** for automated member notification emails, streamlining e-commerce checkout and communication workflows.
- Optimized frontend performance by consolidating **20+ JavaScript libraries** and implementing **lazy loading**, reducing code duplication by **60%** through reusable UI components.

Web Developer & Software Dev Intern

NIT Trichy (AID VISION) — Onsite, Trichy, India | May 2024 – Jun 2024

- Led full-stack development of the **Aid Vision** platform using **React** and **TensorFlow**, delivering **real-time image annotation** and **object counting** features for a startup at NIT Trichy.
- Integrated a preloaded **TensorFlow model** into a **React frontend** for real-time inference, achieving seamless high-performance prediction workflows.
- Managed a **3-member development team** — coordinating task assignments, sprint reviews, and on-time milestone delivery across a 2-month on-site internship.

Head, Web Developer

VARIT 2K25 Symposium — Jamal Mohamed College, Trichy | Dec 2024 – Feb 2025

- Led the complete web development team for **VARIT 2K25**, managing design, frontend, and deployment using **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and animations.
- Designed and deployed a scalable **registration platform** that handled **1,000+ participant** registrations with responsive UI, real-time updates, and event schedule integration.
- Achieved a **30% increase in engagement** over the previous edition; collaborated with a **6-member cross-functional team** ensuring timely delivery, bug fixes, and mobile compatibility.

PROJECTS

RightAlly — AI-First MLM Brokerage SaaS Platform (US) rightally.io

PHP · CodeIgniter · JavaScript · jQuery · Bootstrap · MySQL · AJAX · JSON · REST API · Stripe API

- Developed core modules of **RightAlly**, a US-based **AI-first SaaS platform** for real estate brokerages, enabling brokers to launch and manage **multi-tier revenue share** and **MLM commission networks** using **PHP (CodeIgniter)**, **MySQL**, and **AJAX**.
- Built a dynamic **multi-tier commission calculation engine** with configurable revenue share rules, splits, overrides, and bonuses — supporting complex **downline genealogy trees** across multiple agent levels.
- Developed **agent performance dashboards**, referral network tracking, and real-time income visibility modules using **jQuery** and **AJAX** for live data rendering without page reloads.
- Integrated **third-party transaction platforms** (SkySlope, Brokermint, Dotloop) via **REST APIs** and implemented **Stripe API** for automated payout processing with **role-based access control**.

Shop India — MERN E-Commerce Platform shop-india-red.vercel.app

React.js · Node.js · Express.js · MongoDB Atlas · Stripe API · JWT Auth · Vercel · Render

- Architected a full **MERN stack e-commerce** platform with **JWT authentication**, role-protected routes, dynamic product catalog, and persistent shopping cart powered by **MongoDB Atlas**.
- Integrated **Stripe payment gateway** with server-side order validation and automated invoice workflows, delivering a secure end-to-end checkout experience.
- Configured a **GitHub CI/CD pipeline** deploying **React** frontend to **Vercel** and **Express** backend to **Render**, ensuring zero-downtime production releases on every code push.

Elite Shop — Full-Stack E-Commerce (Next.js) github.com/samirahamath/elite-shop

Next.js 14 · TypeScript · Node.js · Express.js · MongoDB · Stripe · Vercel

- Built a type-safe **e-commerce** application using **Next.js 14** and **TypeScript** with **SSR** product pages, client-side cart state, and a complete **JWT authentication** flow.
- Developed **REST API** endpoints with **Node.js** and **Express.js** for products, orders, and user management, with **MongoDB** handling all data persistence.

Arrahman Stoves — Kitchen Appliances E-Commerce arrahmanstoves.in

PHP · MySQL · JavaScript · Bootstrap · AJAX · Session Management · WhatsApp API

- Built a complete **PHP and MySQL e-commerce platform** for a kitchen appliances retailer, featuring **multi-category product listings** (Gas Stoves, Wood Stoves, Fridges, Fans) with dynamic **AJAX-powered** category filtering.
- Developed **product detail pages**, shopping cart, user enquiry system, and **WhatsApp catalog integration** enabling direct customer ordering and improved conversion.
- Built a full **Admin Dashboard** for product uploads, **category management**, blog publishing, banner management, customer reviews, and contact enquiries with **session-based authentication**.

Giftlia — E-Commerce Gift Store giftlia.shop

PHP · MySQL · PDO · Stripe API · Brevo API · Session Management · Bootstrap

- Architected a server-side **e-commerce** engine with dynamic product catalog, **multi-category filtering**, and **session-based cart** backed by a relational **MySQL** schema for users, inventory, and orders.
- Integrated **Stripe API** for payment processing and **Brevo API** for automated order confirmation emails; secured all DB queries with **PDO prepared statements** against SQL injection.
- Built a comprehensive **Admin Dashboard** with full **CRUD** for product management, real-time inventory updates, order tracking, and media uploads.

Aid Vision — AI Computer Vision Web Platform aid-vision.vercel.app

React.js · Vite · Tailwind CSS · TensorFlow.js · Framer Motion · React Router

- Built a modular **React + Vite** platform for real-time AI tasks — **object annotation** and **object counting** — with API-ready architecture connected to **TensorFlow** Python inference endpoints.
- Structured a scalable **component-based** codebase with **React Router** and implemented scroll-triggered animations via **Framer Motion**, elevating UI interactivity and engagement.

Expert Hub — Full-Stack Service Platform theexperthub.in

React.js · Node.js · Express.js · MongoDB · Tailwind CSS · Vercel · GitHub CI/CD

- Delivered a multi-page service platform with **React.js**, reusable components, structured **client-side routing**, and **mobile-first** responsive design across all viewports.
- Built **REST API** endpoints with **Node.js** and **Express.js**; deployed via **Vercel** with **GitHub CI/CD** for automated zero-downtime releases on every pull request merge.

AI Render Hub — LLM Response Formatter ai.theexperthub.in

Next.js · React.js · TypeScript · Tailwind CSS · OpenAI API

- Developed a specialized AI platform converting raw **LLM outputs** into structured layouts with rendered **math expressions**, **syntax-highlighted code**, and formatted tables.
- Built custom **OpenAI API** integration with **prompt engineering** pipelines for real-time response conversion with minimal latency.

TEHUB — Online Tutoring Service Platform tehub.in

PHP · Laravel · JavaScript (ES6+) · Bootstrap 4 · MySQL · Node.js · Socket.io · React.js

- Built a **Laravel**-based tutoring platform for Chegg experts with secure **signup workflows**, **session management**, and service tools engineered for **high-concurrency** peak traffic.
- Developed a real-time **internal communication gateway** using **Node.js** and **Socket.io** with **SMTP/Mail API** queuing and a **React** dashboard to monitor delivery logs and metrics.

Alshehri — Business Web Application al-shehri.vercel.app

React.js · TypeScript · JavaScript (ES6+) · Tailwind CSS · HTML5 · CSS3 · Vercel

- Delivered a modern, high-converting business web application using **React** and **TypeScript**, implementing **lazy loading**, **code splitting**, and **multilingual mobile-first** interfaces.
- Owned the full development-to-deployment lifecycle in collaboration with design, product, and QA teams — shipping on-schedule releases on **Vercel**.

Vasantham Realty — Real Estate Platform

PHP · MySQL · JavaScript · Bootstrap · Session Management · AJAX

- Developed a comprehensive **real estate web platform** with **property listings**, city-wise and type-wise filtering, **user and agent authentication**, password reset, and **enquiry management**.
- Built **admin dashboard** features including **banner management**, blog publishing, and data reporting to streamline backend operations and content updates.

NME Portal — Student Department Selection Portal nmedemo.free.nf

PHP · MySQL · JavaScript · HTML · CSS

- Built and deployed a real-time **department selection portal** serving **6,000+ students** with **role-based authentication**, **live seat allocation**, and conflict prevention logic.
- Designed a secure **admin panel** with full **CRUD operations** over departments, student records, and seat assignments backed by real-time **MySQL** connectivity.

VARIT 2K25 — Symposium Website

HTML · CSS · JavaScript · Bootstrap · jQuery · Animations

- Designed and deployed the official symposium website with a live **registration platform** supporting **1,000+ participants**, event schedules, live updates, and smooth animations.
- Led a **6-member team** through full development-to-deployment, achieving **30% engagement increase** and maintaining mobile compatibility and performance.
